

<i>ELECTRIC POWER STATIONS—Continued</i>	<i>Section</i>	<i>Page</i>
Types of Condensers	30	42
Water Used for Condensing	30	63
Comparative Cost of Operating Condensers	30	65
Cooling Towers	30	66
Examples of Cooling Towers	30	71
Pipe Fitting	31	1
Loss of Pressure in Piping	31	1
Principal Requirements of the Steam-Piping System	31	6
Electric Generators and Special Apparatus	31	23
Examples of Steam Piping and General Arrangement of Plant	31	28
Requisite Characteristics of Generators	31	35
Measurement of Water-Power	31	44
Dams	31	51
Velocity of Flowing and Falling Water	31	53
Waterwheels	31	56
Turbines	31	56
Impulse Wheels	31	67
Waterwheel Governors	31	71
ELECTRIC-RAILWAY SYSTEMS		
Methods of Supplying Current	36	1
Voltage	36	2
Methods of Current Collection	36	3
Overhead-Trolley System	36	4
Third-Rail System	36	6
Open-Conduit System	36	8
Electromagnetic or Surface-Contact Systems	36	10
Storage-Battery Systems	36	14
Operation by Direct Current	36	15
High- and Low-Potential Bus-Bars	36	15
Boosters	36	17
Alternating-Current Supply	36	27
Polyphase Transmission	36	27
Single-Phase Transmission	36	29

<i>ELECTRIC-RAILWAY SYSTEMS—Continued</i>	<i>Section</i>	<i>Page</i>
The Power House	36	33
Determining the Load Center	36	37
Power Estimates	36	40
Train Acceleration	36	46
Train Resistance	36	52
Power Consumption Tests	36	58
Examples of Railway Equipment	36	63
Cost of Power	36	64
LINE AND TRACK		
The Line	37	1
Feeders	37	3
Trolley Wire	37	9
Methods of Arranging Trolley Wire	37	11
Poles	37	17
Line Fittings and Line Erection	37	21
Trolley Wire and Feeders	37	21
The Track	37	36
Rails	37	37
Rail Sections	37	43
Special Work, Guard Rails, and Curves	37	51
Rail Joints	38	1
Rail Bonds	38	14
Bond Testing	38	27
Track Construction	38	34
Typical Roadbeds	38	36
Interurban Roads	38	36
City Roads	38	37
Third-Rail Roads	38	41
Conduit Roads	38	51
Surface-Contact Roads	38	55
LINE CALCULATIONS		
Economical Use of Feeders	39	1
Examples of Feeder Calculation	39	3
Road Fed From One End	39	5
Power House in Middle of Line	39	6
Effect of Distributed Load	39	7

LINE CALCULATIONS—Continued	Section	Page
Examples of Calculations for Distributed Load	39	8
Calculations for a Loop Line	39	9
Small Road With Return Feeders	39	13
Carrying Capacity of Feeders	39	15
Electrolysis	39	18
Auxiliary Equipment	39	28
The Car House	39	28
The Repair Shop	39	31
Car Bodies and Trucks	39	36
Method of Suspending Motors on Trucks	39	46
MOTORS AND CONTROLLERS		
Street-Railway Motors	40	1
Selection of Motors	40	4
Rating of Motors	40	5
Motor Characteristics	40	7
Types of Motors	40	16
Motor Lubrication	40	30
Armature Windings for Railway Motors	40	32
Field Coils	40	36
Speed Control	40	40
Rheostatic Control	40	40
Series-Parallel Control	40	50
Control of Alternating-Current Motors	40	74
ELECTRIC-CAR EQUIPMENT		
Motor-Circuit Appliances	41	1
Trunk Connections	41	1
Overhead-Trolley Fittings	41	4
Switches and Breakers	41	9
Car Circuit-Breakers	41	10
Fuses	41	14
Lightning Arresters	41	17
Car-Wire Equipments	41	21
Electric Car-Heating Appliances	41	25
Electric Heaters and Connections	41	25
Other Systems of Heating	41	28

ELECTRIC-CAR EQUIPMENT—Continued	Section	Page
Electric-Car Lighting	41	29
Incandescent Lighting Circuits	41	29
Arc Headlight Circuit	41	32
Track Signals	41	34
Brakes	41	36
Hand-Brakes	41	38
Double-Truck Brakes	41	40
Straight Air Brakes	41	42
Equipment With Independent-Motor-Driven Compressor	41	44
Storage Air-Brake Equipment	41	62
Automatic Air Brakes	41	68
Features of Train Handling	41	73
Electric Brakes	41	76
MULTIPLE-UNIT SYSTEMS		
Comparison of Traction Methods	42	1
Types of Multiple-Unit Control	42	6
Sprague General Electric Multiple-Unit System	42	6
Wiring Diagram for Type M Control	42	26
Wiring Diagram of Type M Control With Current-Limiting Device	42	32
Westinghouse Unit-Switch Control	42	36
Control Devices	42	39
Master Controller	42	41
Reverse Switch	42	44
Motor Cut-Out Switch	42	45
Train-Line Coupler	42	46
Limit Switch	42	47
Line Switch	42	48
Line Relay	42	50
Resistance Coil	42	51
Connections and Operation	42	51
Car-Wiring Diagram for Unit-Switch Control	42	56
